## **PLASTERBOARD PRODUCTION LINE:-**

# PLASTERBOARD PRODUCTION LINE

Paperbacked plasterboard is a light construction material, which is made of building gypsum plaster and surface-protected paper mainly, and mixed with small amount of fiber, starch, agglomerant, vesicant, and water. It has many advantages such as light, fireproof, shockproof, heat preservation and so on. In addition, it can be cut, drilled, digged in the process of construction at will with convenience and good decorative effect, furthermore, which can enlarge the useful area of building.

In construction, use paperbacked plasterboard, light steel-keel as non-main wall, which applied widely to all kinds of industrial and civil architecture

The paperbacked Plasterboard (gypsum board) Production Line is a special equipment used for producing a kind of new type construction material, paperbacked plasterboard. The production line is made of three components: material warehouse, heat supply system, machine sets.
